

COURSE SPECIFICATION 6TH SEMESTER

ELECTIVE COURSE

Course Name : Marginal Land Management
Code : KL 672
Credit : (2-0)

Course Description:

Marginal land is land with low potential and productivity. In terms of soil fertility, marginal land is land that has low fertility, either chemically, physically or biologically. The Marginal Land Management course provides an understanding of marginal land, types of marginal land, and how to manage it so that it can be used for better crop cultivation.
